

What are Dentures?

Dentures are custom made dental appliances that replace missing teeth and restore your ability to eat, speak, and smile confidently. Dentures are essential to helping you regain not only your smile, but your quality of life.

Types of Dentures

- Complete Dentures
- Partial Dentures
- Implant-Supported Dentures
- Immediate Dentures
- Interim Dentures

We're Here to Help!

Dr. Rahmat, Dr. Signoriello, and staff are committed to making dentures that look natural, feel comfortable, and help you smile with confidence at the same time restoring function.

Our caring team uses state-of-the-art materials and advanced techniques to make your experience smooth and stress-free.

*Dentures are usually covered under major services by most traditional dental insurance plans.**

No insurance? No problem!

A Guide to Your NU Dentures

NU FAMILY DENTAL

A NU Smile...Tailored For You.

Complete Dentures

Full restoration, fully removable.

Dentures not only replace missing teeth, but also support your facial structure, improve your bite, and restore confidence in your smile.

When Are Dentures Needed?

- Multiple missing teeth
- Severely worn, loose, or damaged teeth
- Gum disease or bone loss
- Difficulty eating or speaking
- Facial sagging or a sunken appearance
- Desire for a full smile restoration

Partial Dentures

Fully removable, rigid or flexible.

The Denture Process

1. **Consultation and Exam:** We discuss your goals and evaluate the best denture type for you.
2. **Intraoral Scan/Impressions:** Digital custom molds ensure a natural, comfortable, and precise fit and look.
3. **Try-In w/ adjustments:** Your preview your denture's loom and feel before final processing.
4. **Delivery, adjustments, and care:** We fit your new dentures and teach you how to care for them at home.
5. **Follow-up Visits:** Regular check-ups keep your dentures fitting comfortably and functioning their best to last.

Immediate and Interim Dentures

Instantly placed after extraction. **Temporary solutions.** Require multiple adjustments and relines.

Implant-Supported Dentures

Anchored to implants. Superior comfort + stability. NO slipping or adhesives.
